

Military NBC – Protection Suit

KEY FEATURES

- Inexpensive two – piece construction in multiple colors and four sizes
- Integrated hood, gloves, and overshoes
- Already in Service and Proven technology and design
- Quickly donned over existing clothing including shoes
- Exceptional strength and protection in a lightweight barrier fabric
- Lightweight
- Vacuum packed for low – volume storage
- Meets ASTM and NFPA requirements
- High resistance to tearing, puncturing or snagging
- Increased mobility and flexibility
- Redundantly and aggressively tested against chemicals and agents, including those suggested as potential WMD terrorist agents and military NBC agents. Documentation reports are available.
- Meets NATO requirements
- Long shelf life
- Disposable by incineration with no toxic residue

PROTECTION SUIT DESCRIPTION

Protection jacket with integrated hood and gloves. Protection trousers with integrated overshoes. The sole is reinforced to ensure fast going in normal open country without damage to the foil. Highly functional and quick locking closure for both jacket and trouser.

COMMENTS

EUROLITE® Military Protection Suits were first used by Austrian medical personnel in Operation DESERT STORM. Currently they are in use with the US – Navy Special Warfare Group and the Austrian Military.
